OBJECTIVE

Frontend Developer with hands-on experience building responsive, production React.js interfaces at ZFA Labs Private Limited. Extends this into full-stack development through self-built projects using React.js, Django, PostgreSQL, and REST APIs, backed by solid SQL and database design fundamentals. Brings a disciplined, detail-driven approach to data accuracy and issue resolution, developed through a prior high-volume operations role. Looking to grow into a Web Developer (Frontend/Full-Stack), Application Support, or Database Administration role where both coding ability and data discipline add value.

TECHNICAL SKILLS

Programming Languages: SQL, Python, JavaScript

Web Development: HTML, CSS, Bootstrap, React.js, Django, REST APIs, Axios

Databases: PostgreSQL, SQL (querying, data manipulation, joins, schema design)

Application Support & Data Ops: data verification, reconciliation, troubleshooting, TAT-driven resolution

Tools & Platforms: Git, GitHub, Vite, Vercel, Postman, VS Code

CS Fundamentals: Object-Oriented Programming, Software Development Life Cycle (SDLC), DBMS

EXPERIENCE

Frontend Developer Intern | ZFA Labs Private Limited

Mar 2026 – Present

- Building responsive, reusable UI components for a Customer Relationship Management (CRM) application using React.js, HTML5, CSS3, JavaScript, and Bootstrap.
- Implemented authentication flows, dashboard screens, and customer and lead management pages, integrating REST APIs with Axios to connect the frontend to backend services.
- Ensured responsive design across devices and screen sizes, and debugged and tested application code to improve usability, performance, and overall user experience.
- Collaborated with the backend team using Git for version control, participating in code reviews to align frontend and backend development.

Executive | Hexaware Technologies

Jan 2025 – Feb 2026

- Managed end-to-end US healthcare medical billing lifecycle — claim submission, adjudication, and reimbursement tracking — ensuring data accuracy across high-volume records.
- Performed eligibility verification, charge entry, payment posting, and AR follow-ups within strict TAT targets, while coordinating with insurers to resolve claim discrepancies.
- Maintained HIPAA-compliant billing records with strong attention to detail, reflecting disciplined, database-style data handling.

PROJECTS

Anvaya — E-Commerce Platform | Python, Django, PostgreSQL, JavaScript, HTML, CSS, Bootstrap 5

- Developed a full-stack e-commerce platform using Python, Django, PostgreSQL, JavaScript, HTML, CSS, and Bootstrap 5, with authentication, product catalog, search, filtering, wishlist, cart, and checkout workflows.
- Designed relational PostgreSQL database architecture for users, products, categories, inventory, carts, orders, addresses, payments, and reviews.
- Built a comprehensive admin dashboard for product, inventory, customer, order, and discount management, including order tracking and coupon logic.
- Developed and integrated REST APIs, tested backend endpoints using Postman, and built a responsive, mobile-friendly UI with Bootstrap 5.

Sonai Agro Farm — Agro-Tourism & Farm Commerce Web Application | React.js, JavaScript, HTML5, CSS3, Vite, Git, GitHub, Vercel

- Designed and developed a responsive multi-page agro-tourism web application using React.js, featuring farm stays, experiences, events, farm products, gallery, booking, and contact modules.
- Built interactive product-category modals, shopping cart with quantity management, event-detail and enquiry popups, multi-step booking flows, image galleries, and guest feedback with multiple-image upload.
- Created reusable React components and responsive layouts optimized for desktop, tablet, and mobile devices, with custom UI/UX inspired by premium rural hospitality.
- Used Git and GitHub for version control, optimized large website image assets for production, configured React Router rewrites, and successfully deployed the production build on Vercel.
